Backend: Node.js, Express.js

Database: MongoDB, mySql, Sql

Cloud & DevOps (Basic): AWS, Docker, Kubernetes, Git, Bitbucket

Other Technologies: Git, Github, Jira, Postman

PROFESSIONAL EXPERIENCE

Software Engineer

March 2023 - Present

Venuemonk Technologies

Gurgaon Haryana

- Joined as a Frontend Developer and grew into a Full Stack role over time by taking on backend responsibilities alongside the web and mobile stack.
- Worked across frontend, backend, and mobile applications using React.js, Next.js, React Native, Node.js, Redux, and TypeScript, taking ownership of features from requirement gathering to deployment and post-release support.
- Collaborated with product managers, designers, QA engineers, and backend developers to plan, develop, test, and deliver features within sprint timelines, ensuring smooth releases and high-quality user experiences.
- Built and maintained 20+ landing pages, dashboards, and business-critical tools, while improving website performance, SEO, and mobile user experience, contributing to increased user engagement and platform growth.
- Developed and maintained scalable Node.js APIs across multiple projects, migrated 400+ legacy APIs to ES6+, and optimized application performance through code refactoring and improved state management practices.
- Created reusable React and React Native components, including booking calendars, date pickers, and workflow modules, reducing development effort by approximately 30% and enabling faster feature delivery across teams.
- Resolved daily issues, bugs, or any additional features provided in Jira by Testing Unit, making the application bug-free and updated to the current requirement by 100 percent.

Web Developer

July 2022 – Sept 2022

Digi-Vertex Solutions Pvt. Ltd.

Gurugram, Haryana

- Worked on the frontend development of the company's official website using React.js, building responsive user interfaces, enhancing existing pages, and contributing to a smoother user experience across desktop and mobile devices.
- Contributed to the development and maintenance of the company's internal accounting platform by creating UI modules, implementing new features, and improving usability, helping streamline day-to-day operations for internal teams.
- Collaborated with senior developers to develop, test, and deploy frontend features, resolve bugs, and deliver project requirements within deadlines, while gaining hands-on experience with React.js, component-based architecture, and modern web development practices.

PROJECTS

Venuemonk Website | Next.js, JavaScript, Redux

One of India's leading wedding venue discovery platforms connecting couples with venues across the country.

- Built and maintained 20+ landing pages, campaign pages, and lead-generation funnels, including Get Quote, Makeup Artist, Corporate Events, and Review & Win Prizes, helping drive user acquisition and engagement.
- Developed new user-facing features and optimized existing modules while ensuring responsiveness, scalability, and a consistent experience across desktop, tablet, and mobile devices.
- Improved website performance and SEO through code optimization and page-level enhancements, reducing page load times by approximately 35% and contributing to a 40% increase in mobile user interactions. ([Link](#))

Venuemonk CRM & Biz App | React Native, Redux, Node.js, TypeScript

Venuemonk CRM is an internal sales application, while Biz App is a partner-facing platform used by venue owners to manage leads and bookings.

- Developed and maintained mobile applications used by sales teams and venue partners, working across UI development, API integration, state management, testing, and production releases while ensuring a smooth and reliable user experience. ([Link](#))
- Built and enhanced features for lead management, task tracking, notifications, and booking workflows, helping teams manage inquiries more efficiently and improve day-to-day operational productivity.
- Developed a custom booking calendar along with reusable React Native components, reducing development effort by approximately 30% and supporting a platform handling 4,500+ leads per month. ([Link](#))

Partner, Sales & Admin Portals | React.js, Redux, Node.js

Internal business applications built for venue partners, sales teams, and administrators to manage leads, bookings, reporting, and daily operational workflows.

- Improved and maintained the Partner Portal by adding new features, enhancing dashboards, and simplifying day-to-day workflows, helping increase partner engagement and overall business activity. ([Link](#))
- Built and maintained features for lead tracking, notifications, task management, and reporting, making it easier for the sales team to manage inquiries and follow up with customers
- Developed and enhanced admin tools for managing leads, bookings, users, and business data, helping internal teams handle operations more efficiently and reducing manual work.

Slide Dating App | React Native Expo, Node.js, MySQL, TypeScript

Mobile dating application focused on swipe-based interactions and rich media sharing.

- Contributed to full-stack development by building mobile screens, integrating backend APIs, and implementing core user flows for profile interactions, matching, and engagement features.
- Developed photo and video upload functionality and delivered UI improvements that contributed to approximately 30% growth in daily user interactions and overall user engagement. ([Link](#))
